MATIAS DANIEL ALESSANDRELLO

Technical Operations & Support Analyst | SQL, Data Analytics (R / Python) & AI Automation
Adrogué, Buenos Aires, Argentina | +54 9 11 3669-0663 | matialess@gmail.com
LinkedIn: linkedin.com/in/matias-daniel-alessandrello | GitHub: github.com/malessan4 | Portfolio: matialess-portfolio.vercel.app

PROFESSIONAL PROFILE

Software & Data Technician with hands-on experience in **SQL data modeling, statistical visualization (R / ggplot2), payment gateway webhooks, and workflow automation using Python, n8n, and AI tools**. Complemented by a solid **10-year background as an Emergency Department Administrative Assistant**, providing exceptional skills in first-line client support, fast decision-making under pressure, and cross-functional case resolution between clients, internal teams, and third-party providers. **Full availability for the Tuesday to Saturday (12:00 – 21:00) schedule.**

CORE SKILLS & TECHNICAL STACK

- **Data Analytics, BI & Visualization:** R (`ggplot2`, Statistical Data Modeling, Data Visualization), SQL (PostgreSQL, SQLite, Supabase), Operational Dashboards, KPI Monitoring, Outlier & Deviation Detection.
- **AI & Process Automation:** Workflow Automation (n8n, Webhooks, CRON Jobs), Python Scripting, LLM Integration, AI-Assisted Diagnostics & Auditing (Claude Code, Antigravity, OpenCode).
- **Payments & FinTech Operations:** Payment Gateway Integration (Mercado Pago API), Asynchronous Webhooks, ACID Transactions, Rate-Limit & Quota Monitoring (RPM/TPM/RPD), RESTful APIs.
- **Ticketing & Operations Tools:** Jira / Kanban Case Management, Agile Methodologies (Scrum/Kanban), Git/GitHub, Docker.
- **Programming & Scripting Languages:** R, Python (FastAPI), SQL, Go (Golang), TypeScript/JavaScript (Node.js, Nest.js, Next.js), C# (.NET), Java (Spring Boot).

TECHNICAL & OPERATIONAL PROJECTS EXPERIENCE

Backend & AI Automation Analyst | Educational Content Accessibility Assistant
Innova Lab – Agencia de Habilidades para el Futuro (September 2026 – Present).

- Designed and implemented an automated auditing and diagnostic engine using **Python (FastAPI)** and **LLMs**, combining deterministic heuristic rules with AI semantic analysis to streamline recurring evaluation tasks.
- Built an operational monitoring and fault-tolerance system for API Key rotation, tracking real-time usage **KPIs and quotas (RPM/TPM/RPD)** and automatically detecting and resolving rate-limit deviations (HTTP 429) with graceful degradation.

- Modeled and managed the data persistence layer in **SQLite (WAL mode)** with automated background cleanup (TTL), backed by +90 automated tests in Pytest to guarantee operational reliability.

Payments & Backend Specialist | Racha+ & Bella Boutique (E-Commerce & Subscription Platforms) *Production Projects / Freelance (January 2026 – July 2026)*

- **Payments Operations & Webhooks:** Integrated **Mercado Pago APIs** and asynchronous **Webhooks** to automate payment processing, subscription status updates, and transaction reconciliation.
- **Database Integrity:** Modeled relational databases in **PostgreSQL (Prisma ORM / Supabase)**, enforcing strict ACID transactions and referential integrity to prevent payment discrepancies and duplicated records.
- **Operational Testing:** Conducted end-to-end transaction auditing and API testing to detect edge-case failures and ensure secure, stable payment flows for end users.

Data & Systems Developer | Inmobiout & Consul-Medic (Management & Metrics Platforms) *Production Projects / Freelance (December 2025 – September 2026)*

- **Operational Dashboards & KPIs:** Designed and built administrative dashboards for real-time visualization of operational metrics, patient/client tracking, and lead conversion indicators.
- **Data Modeling & Extraction:** Architected normalized **PostgreSQL** databases with indexed queries to extract, filter, and analyze high volumes of operational and clinical records efficiently.
- **Process Automation:** Automated lead capture workflows, role-based access control (RBAC), and dynamic PDF report generation on demand, reducing manual administrative tasks.

Systems Developer | Core Banking – Account Management API *Personal FinTech Project (July 2026 – September 2026)*

- Developed a Core Banking transactional API in **.NET 9 (C#)** and **SQL**, focusing on financial data consistency, account balance validation, layered architecture, and documented RESTful endpoints for real-time consumption.

Automation & Backend Developer | Nido & JamTime (Collaborative Scheduling Platforms) *Production Projects / Freelance (June 2026 – August 2026)*

- Automated background notifications and recurring operational alerts using concurrent **CRON Jobs in Go (Golang)**.
- Modeled complex relational schemas in **PostgreSQL** with composite indexes and uniqueness constraints to guarantee data consistency across concurrent multi-user operations.

OPERATIONAL SUPPORT & CASE MANAGEMENT EXPERIENCE

Emergency & Admissions Operational Support Specialist | Sanatorio Juncal *(2015 – 2025)*

- **First-Line Client Support:** Served as the primary point of contact in a critical, fast-paced environment, managing high volumes of daily cases and delivering a reliable service experience under pressure.
- **Cross-Functional Case Resolution:** Coordinated directly with internal medical teams, billing/auditing departments, and external health insurance providers to investigate, escalate, and resolve complex administrative and coverage cases end-to-end.
- **Data Accuracy & Deviation Detection:** Audited admission records, billing authorizations, and patient data in real time to detect operational deviations and resolve bottlenecks quickly with autonomy and structured judgment.

Administrative Operations Assistant | Argentine Navy – General Headquarters (Health Dept.) *(2014 – 2015)*

- Managed confidential documentation, data entry, and internal operational support workflows with strict adherence to institutional protocols and data traceability.

EDUCATION

- **University Technician in Programming** | Universidad Nacional Guillermo Brown *(In progress – 52% completed)*
    - *Relevant Coursework:* Information Visualization & Data Analytics with **R and ggplot2**, Relational Databases (SQL), Algorithms & Data Structures.
- **University Analyst in Cybersecurity Risk Management** | Universidad Nacional de la Defensa *(In progress – 21% completed)*
- **Bachelor's Degree in Composition with Electroacoustic Media** | Universidad Nacional de Quilmes *(Graduated)*

CERTIFICATIONS & COURSES

- **Relational Databases and SQL** | Universidad Nacional Guillermo Brown (2024)
- **Introduction to Artificial Intelligence (AI)** | Talento Tech (2025)
- **Full Stack Java & Web Development (Node.js / JS)** | Codo a Codo (2024) Link

LANGUAGES

- **Spanish:** Native
- **English:** Upper-Intermediate / Advanced (B2) – Proficient in technical documentation, written case communication, and professional collaboration.
